   Auditor, Vicki Hokokian, CPA, Wilcox Hokokian Bains & Dill, LLC, apologized for the delay in providing audit reports due to the COVID19 pandemic. She reviewed the “Audited Financial Statements & Other Financial Information” reports in detail for the fiscal period March 1, 2019-February 29, 2020, and commented as follows:
   
   ▶ Monitor the budget-to-actual, especially water and power costs as these two items are very dynamic and are subject to the greatest fluctuations depending upon CVP allocations.
   
   ▶ Water availability is a concern. Given the current state of the economy, normal operating revenues might be insufficient to provide the funds necessary to meet the District’s obligations. She recommended the Board continue to establish a plan, which includes other resources beyond its normal operating revenues, to meet future obligations.
   
   ▶ She complimented District staff on their work.

   ▶ **ACH (Electronic) Payments**

   At the Board’s request, Mrs. Hokokian discussed implementing ACH (Automatic Clearing House) payments via the District’s website. She acknowledged the popularity and convenience of electronic payments. She expressed concern, however, that under the District’s current banking arrangements, the District’s bank routing & account numbers would have to be given to each payer. Should the Board elect to proceed, she suggested utilizing a separate account for protection. The Board would have to analyze the cost-benefit. Additionally, security and liability issues must be weighed.

   Following discussion, the Board expressed their appreciation to Mrs. Hokokian and her staff. Mrs. Hokokian then exited the meeting.

IX. ACTION ITEMS
A. SOLAR PROJECT: WHITE PINE RENEWABLES (03/09/2021)
Dylan Dupre of White Pine Renewables reported PG&E approved our contract. Connection locations had to be changed. The 5MW project was split into two installations, one 4MW and one 1MW. This split eliminated an estimated $3 million cost for a line upgrade had the single project remained at 5MW. Each installation will be metered separately and can be integrated without modification to the PG&E system. He is working to fast-track the application and is
optimistic the project should be operational the first quarter of 2022. There will be no change in the price of KWH delivered. These changes will require redrafting contracts. There will be two metering groups which allows more flexibility. All meters can now be included, including the office. Now that PG&E has approved, we should see the project progress.
